

THE BASANO MAIL

BASANO, ALBERTA, THURSDAY, AUGUST 21, 1930

VOLUME 50, No. 7

NO FIGURES YET ON WHEAT POOL PAYMENT

Humbled That Premier's Promises Will
Discuss Forming of Wheat
Board

Members of the wheat pool in Alberta, Saskatchewan, and Manitoba are anxiously awaiting the outcome of the conference in Winnipeg to learn what the pool will pay on the new wheat crop now being harvested.

The conference was attended by pool representatives from all three prairie provinces and the leading banks of the Dominion. The session lasted several days and it was expected a decision would be reached and an announcement of the payments the pool would make would be given out by today, Thursday.

Talk of Wheat Board
A last minute Canadian Press dispatch from Regina published in the Calgary Alberta Herald as follows: "Premier John Bracken, of Manitoba and a representative of Premier Brownlee of Alberta will meet with Premier J. T. M. Anderson in Regina Friday to discuss the creation of a wheat board to handle the marketing of the western wheat crop for 1930. It was learned on the highest authority last night, that Bracken, when approached last night, had no statement to make on the subject.

Early this week the pool directors sent a resolution to the Saskatchewan government asking that steps be taken to provide for the marketing of the 1930 crop through the Wheat Pool on a single channel. The reason for the request was the condition of the export market, together with the need of protecting the wheat growers.

From another source of information it has been learned that the Wheat Pool directors took this action because the banks would not advance the amount on the 1930 wheat crop required by the Pool.

These factors combined made it imperative that some action be taken to protect the wheat grower, hence the request of the Wheat Pool directors who have been in session here this week.

As there is nothing definite in the foregoing report, it cannot yet be said how the pool will handle the 1930 crop. The directors of the three prairie pools are doing everything possible to settle the problem in a manner that will bring the greatest benefit to pool members. They must arrive at a decision within a few days for the new wheat crop is coming into the elevators and members must be paid so they can meet their financial obligations.

Gem Farmer Wins Second Prize In Crop Competition

P. P. Cheneau, Gem farmer, was awarded second prize in barley in the standing crop competition conducted by the Brooks Board of Trade. Carson Frode, of Duchesne, won first prize in barley.

The other prize winners were: wheat, 1st, Benson Brothers, Tilly; 2nd, John Ledene, Scandia; oats, 1st, Perry Ledene, Scandia; 2nd, Wm. Hesseop Tilly; alfalfa, 1st, John Ledene, Scandia; 2nd, A. K. Anderberg, Kyremore.

Gem News

GEM, Aug. 20.—The staff for Gem consolidated school has been appointed. The teachers are: principal, Chas. Douglas; intermediate teacher, Miss Poe; junior teacher, Miss Marie Chamberlain.

Gem and district school fair will be held on Friday, September 5. The children have prepared many exhibits in school work, domestic science, garden products and live stock, and they are looking forward to the day of the fair with keen anticipation.

Mrs. N. H. Nelson and son Don, arrived this week and are visiting with Mr. Nelson on Omega Ranch, formerly the Ogilvie ranch. Mr. and Mrs. Nelson will go to England this fall, and will return here next spring.

Mrs. J. B. Wallace is away on a vacation.

Mrs. Fryberger Sr., who has been visiting her daughter Mrs. Porino, returned to Montana last week.

Clara Fryberger has returned to Regina, Saskatchewan.

Mrs. Wm. McLawe and children, of Basano, are enjoying a week at the Williamson ranch.

The 1930 crop is now being delivered at the Wheat Pool elevator in Gem. The first wheat arrived on August 20, and came from Deer Lake, Manitoba.

The repair crew was busy early this week making repairs on the Wheat Pool elevator.

Mrs. Vlast Sr. spent Sunday with the Keeling family.

Mr. Keeling Sr. was in Calgary Wednesday and Thursday this week.

There are some wonderful gardens in Gem Colony this year.

George DeKman arrived in Gem last Saturday to help with the harvesting of the crop. He is staying with his daughter, Mrs. Turner.

WARNING AGAINST CUTWORM MENACE

Cutworms Expected to Be Prevalent
In 1932

The Dominion entomologist at Lethbridge and Saskatoon, H. A. Seaman and R. M. King, have issued a very grave warning to all farmers in Alberta and Saskatchewan regarding the great damage to crops that may occur next year because of the cutworm.

The dry May and part of June that has been experienced in most parts of Alberta and Saskatchewan this year has tended enormously to increase this insect pest, and it is expected that unless May and June of 1931 are much wetter than is usually the case, that the greatest and most widespread damage that has ever been experienced will result from cutworms.

Most of the cutworms that are now in the south of Saskatchewan, it is expected, will be badly affected with the worst damage within a hundred mile radius of Regina, Saskatchewan.

It is expected that the cutworms will probably be very general east of a line from Edmonton to Macleod and as far south as the Lethbridge-Kelowna line of the Canadian Pacific railway.

The damage to the 1931 crop will depend absolutely upon the way fields are handled this present year and September.

The moths of the cutworms feed on the cutworms from the fields and lay its eggs, starting in the first few days of August, reaching by the maximum flight about the 20th, and continuing to fly and lay eggs until about the middle of September.

This moth will avoid all fields that have had even a slight crust formed upon it by rainfall, but will lay its eggs upon any soil where this crust has broken, however slightly.

To avoid cutworm damage on a field, therefore, it is necessary that an summerfallow land all work should be stopped by the first of August or a very few days afterwards.

Then a very slight rain will form a crust on these fields, which will render them safe from cutworm damage.

It is important that no horses or stock or implements or wagons be allowed to cross any summerfallow prepared in this fashion, because wherever the crust is broken by animals or implements, the moths will lay their eggs, and considerable damage will be experienced the following year.

On fields in crop, where harvesting operations are conducted before about September 1, then damage the following year is almost certain to be experienced unless these fields are summerfallowed.

It is apparent, therefore, that all fields which are cropped this year, as far as possible, should be summerfallowed in the year 1931, and in addition all work on summerfallowed fields this year should cease as soon after August 1 as possible, and that nothing should be allowed to walk over or cross these fields.

H. L. Seaman, Dominion entomologist stationed at Lethbridge laboratory, without hesitation states that it is far better to allow weeds to grow on the summerfallow after August 1 in those affected areas rather than to disturb the crust of the soil and so invite cutworm damage.

It is apparent, therefore, that all fields which are cropped this year, as far as possible, should be summerfallowed in the year 1931, and in addition all work on summerfallowed fields this year should cease as soon after August 1 as possible, and that nothing should be allowed to walk over or cross these fields.

Brooks Will Have Agricultural Fair

Products of Irrigation Farms Will
Be on Exhibit September 1 and 2

The annual fair of the Brooks Agricultural Society will be held in Brooks on Monday and Tuesday, September 1 and 2.

Live stock and agricultural products of every description grown on the irrigation project will be on display at this fair. The list will include field grains and grasses, root crops, garden vegetables, and horticultural products. There will also be exhibits in household science.

A fine list of horse races, men's foot races, and boys' and girls' races is on the program for both days. Music will be furnished by the Vulcan 25 piece band, and there will be dancing both nights.

Hussar News

HUSSAR, Aug. 20.—Mr. and Mrs. Fred Buck and Mr. and Mrs. V. Vermillion motored to Barron on Sunday to visit Mr. and Mrs. E. Oliver.

Mr. and Mrs. T. Ansbury, Mrs. F. English, and Mrs. T. Burdett, and Marjorie and Edith motored to Basano on Saturday.

The tuition fees for high school in Hussar for non-residents are to be \$50 per year, beginning this fall. A new steam heating plant has been installed in the public school.

Mr. and Mrs. A. A. Cliffield, Lila and June, returned from Banff on Friday. Miss Evelyn Cliffield left on Saturday and a visit with Mrs. Robinson in Exshaw.

The Misses Madge and Elsie Kiddle motored over from High River on Saturday.

All of grade 8 of the Wintaring Hills school passed this year. In addition to the names already given Ailsa Halsey and Jack English were also successful.

Mrs. J. R. MacDonald, Mrs. Middleton and son Rodney, Mrs. McParlane and son Jack, and Mr. Brown motored down from Calgary on Sunday. They went out to Mr. Forgy's, and Miss Edna, who has been visiting here, returned with them to Calgary.

E. J. Bell and C. T. Armstrong motored to Calgary Monday evening. The town council has extended the time to discount on current taxes to October 1.

Mr. and Mrs. P. C. Farley returned from their holiday trip on Sunday.

The new wheat crop is a fine sample of grain, all deliveries to Basano so far grading No. 1 Northern. The grain has a good weight, going 60 to 64 pounds to the bushel.

It is believed the excellent quality of the wheat this year is due to the late rains which arrived when the grain was filling and just beginning to turn in color.

WHEAT YIELD HIGHER THAN WAS EXPECTED

Yield in Non-Irrigated Area Running
as High as 16 Bushels per Acre

Harvesting operations are now in full swing in the Basano and neighboring districts, and combines are working long hours to get the crop off in the shortest possible time.

On many farms the yield is turning out better than was expected. Wheat on non-irrigated land is threshing all the way from 5 bushels per acre on the poorer fields to 15 bushels per acre on good summer-fallowed land.

Roy Cline has the best yield reported to date. He expected about 12 bushels per acre, but actually the crop is threshing out about 18 bushels per acre.

Other farmers are getting more than was expected, and although it is early in the harvest it is believed the yield on the whole will be about 25 per cent greater than was estimated three or four weeks ago.

The first 1930 wheat to be delivered in Basano was hauled in last Friday, August 16, and came from the farm of E. F. Mauser.

Three Delegates Are Appointed For Meeting Of League Of Nations

Ottawa—Canada will be represented at the next meeting of the League of Nations by the Hon. J. H. Borden, Senator Thomas Chapin and Hon. Mrs. Mary Irene Parry. It was announced here recently. The assembly meets in Geneva early in September, and before that, there will be a meeting of the council of the league. Canada's representative on the council will be Sir Robert Borden, leader of the Canadian delegation.

Sir Robert Borden, Canada's war time premier, has long been a staunch advocate of the league. He was one of the original signatories of the League of Nations covenant in 1919, out of which grew the league assembly and the council. Senator Chapin, who resides in Quebec, was distinguished by his historical writings. He is the author of a number of books. He was for some time professor of history in Laval University. He was a minister without portfolio in the Talbot government, in Quebec, and leader of the government in the legislative council back in 1903. He became a senator in 1919.

Hon. Mrs. Mary Irene Parry is minister without portfolio in the Alberta Provincial Government. She represents Lacombe in the legislature. She was provincial president of the United Farmers of Alberta for four years. For two years she was a member of the board of governors of Alberta University. In the last two provincial general elections she has been returned as a candidate of the United Farmers of Alberta.

Canadian Butter For China

First Test Shipment Of Dairy Butter Will Go Forward On Sept. 4th. Victoria, B.C.—Close on the heels of a successful trial shipment of B.C. fresh milk to the Orient comes word of a special order for the shipment of prime dairy butter from Hong Kong, now being arranged through the Department of Agriculture.

On September 4, the first test shipment of butter, under the knowledge of the department will cross the Pacific for the Far East. The shipment is successful it will be followed by the opening of a considerable market for B.C. butter. The prospect of landing fresh dairy products from this coast has attracted wide attention in the Orient and will be developed on a most extensive scale if the results warrant it.

The butter will be shipped to Hong Kong in cars of the Canadian trade commissioner at that point.

Calgary Cadets Win Trophy

High School Cadets Capture United Empire Trophy at Ottawa. Connah's Rangers, Ottawa, Ont.—Calgary high school cadets won the United Empire trophy, the trophy of the cadet team which won aggregate score in the Tyro MacDougall, bankers and cadet matches at the Dominion of Canada Rifle Association meet here. The Calgary score of 273 points, as against 966 for Hamilton, Ont., Central Collegiate "A" team, and by Winnipeg Highland College.

Masses Interviewed Premier. Ottawa, Ont.—Following a three-quarter hour conference between Premier R. B. Bennett and Hon. Vincent Massey, in the prime minister's office in the East Block, Mr. Bennett stated, "I asked Mr. Massey to see me and had a very satisfactory talk." The prime minister went no further than that, and Mr. Massey, when leaving, declined to discuss the visit.

Adopt Rotary Plan

Windsor, Ont.—With the object of providing at least some employment for its members, and to tide them over the present period of depression, the local bricklayers' union is attempting to introduce a "rotary" system of employment on construction work in the border cities. Thus, each crew would work one week and be idle the next.

Motion Picture Operator Killed

Edmonton, Alberta.—V. A. Crawford, Westlock, Alberta, photographer and motion picture operator, was killed instantly when he was struck by the roadway a mile from Glendon Di Barre, and upset in the ditch. According to Alberta provincial police reports Mr. Crawford escaped serious injury.

Tribal Unrest Spreading

British Forces In India, However, Appeal To Peace. Peshawar, India.—The spirit of tribal unrest appears to be spreading on the northwestern frontier, with British forces lightening the defense by increasing aerial bombing operations and rushing fresh troops northward.

Most of the tribes who have been besieging this strategic city for a week have withdrawn under constant bombing, but messenger reports from the countryside indicate that they have spread in all directions and that all branches of the tribe have taken up arms.

An indeterminate number of Draknis have joined the Afridis, a party identified as Massaoi attacked Badama Post, and the Chankimans were on the war path until the air force informed them that their own village would be bombed unless they ceased their depredations.

Peshawar itself was quiet, and apparently most of the assassins have withdrawn under heavy bombing. One party attacked the cantonment, but they were scattered by rifle fire that did no damage. They withdrew at dawn.

Meanwhile, fresh troops arrived on an armored train from Lahore. The city gates were opened for it, but ordinary trains must stop at Nowshera and the passengers continue here by taxicab.

The six squadrons of army airplanes on duty in the sector are credited with a breaking up of a party for a mass attack on Peshawar. In one day these machines dropped 4,000 incendiary bombs, and they have been daily attacks on various groups. As one instance they spotted the 1,500 Massaois who attacked Badama Post, and wounded 20 of them.

Will Oppose Stevens

Independent Labor Candidate Announces His Intention Of Running In East Kootenay. Cranbrook, B.C.—Opposition to Hon. H. H. Stevens in the by-election for the Far West, where the Minister of Trade and Commerce, will seek election shortly, cropped up here. William Robson, director of the Provincial Labor Bureau on Monday, announced he will oppose Mr. Stevens in the by-election as an Independent Labor candidate.

Mr. Robson has been identified with Labor interests since 1918, and was formerly of Vancouver. He was employed with the B.C. Bureau for the past seven years. Action of district Liberals will be determined at a meeting to be called within a few days.

M. McLean, of Fernie, Conservative, won the East Kootenay seat in the recent election, and resigned to make way for Hon. H. H. Stevens, defeated in Vancouver and given a political berth in the Bennett administration.

Wins Scholarship

Lloydminster, Sask. Delbert Clarke, of Lloydminster district, graduate from the University of Saskatchewan with high honors in history and economics, has been awarded a \$500 scholarship for 1930-31, from the Canadian Pioneer Program committee. The award was made from Queen's University, Kingston. He will study history under Prof. A. S. Morton, of the University of Saskatchewan.

Infantile Paralysis In East

Ottawa, Ont.—Two deaths from infantile paralysis were reported here by the health authorities here recently. The victims were Eddie Curran, 16, and Albert W. Ferguson, the same age. No new cases have been reported by medical officials, and the number now remains at 12. There has been no change in the situation in East Windsor Township.

B.C. Miners Established

Merrit, B.C.—One man was killed and 30 are entombed as the result of an explosion in the Colmont Colliery, Colmont, near Princeton, Word reached here of the disaster, and plans are being considered to send men to help free the entombed miners.

Plane Saves Life

Burlington, Vt.—An airplane, sent to look for a man lost in the forest by airplane, and dropped by parachute, saved the life of a bush-factory employee narrowly escaped with the deadly fast working device.

Alberta Protests

Claim That Foreign Immigrants Are Being Dumped In Province.

Edmonton, Alberta.—Capt. J. H. Johnson, superintendent of the Soldier Settlement Board here, has been accused by the Department of Labor, at Ottawa, to investigate charges that 200 German immigrants were dumped in Alberta last week. The charge has been repeated in the press as a telegram of protest sent to Premier R. B. Bennett by Hon. George Woodley, acting premier of Alberta.

Denial of the allegations has been made by the steamship company concerned, and by the editor of "The Herald," German newspaper here, but Walter Wimmer, secretary of the association of German-speaking workers, insists the charges be leveled are well-founded.

UNEMPLOYMENT SURVEY IS MADE BY GOVERNMENT

Meeting Of C.M.A.

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labor, announced recently, that the government is making a quick survey of unemployment conditions in Canada, and that the employment service council has been called to meet here on August 21 to consider information which will have been gathered by that time.

After the council has discussed the situation disclosed, recommendations will be made for consideration by the government and will form a basis for unemployment relief measures to be submitted to parliament at the special session early next month.

In the last day or two, the minister stated, the Department of Labor has communicated with all the provinces and with the mayors of municipalities with population of 10,000 or more, asking them to advise the department as near as possible the extent of unemployment and to estimate what the situation will be this coming winter. They have been asked to send the information in within 10 days, so that the department will be able to sift the data and have it ready for the meetings of the unemployment service council.

Wheat Exports Increase

Nearly 900,000 Bushels Exported From Vancouver In One Week. Vancouver, B.C.—Nearly 900,000 bushels of wheat were exported during the past seven days, according to the weekly report of the Vancouver Board of Harbor Commissioners. The actual total for the past week was 860,100 bushels.

The export this season to date is 1,570,285 bushels, as compared with 431,084 bushels at the corresponding date last year. The elevators had in stock at 8 a.m., a total of 5,649,529 bushels, and the railways had 1,514,300 bushels on British Columbia divisions, or in terminals here. There are ships in port for 170,154 bushels.

Injured In Car Collision

London, Ont.—Hon. Donald Rutherford, Minister of National Defense, was injured in a collision with a truck and overturned in a ditch.

JAP PARTY TOURS CANADA

Compulsory Military Training. Vancouver, B.C.—A bill for temporary suspension of compulsory military training has been introduced in the House of Representatives by the government. It is intended as a measure of economy.

Leading Business Men Of Japan

arriving at Vancouver recently from the East, about the Canadian Pacific liner "Empress of Canada," received an official welcome from Mayor W. H. Malin, and representative Canadian business men during their two-day stay in the Canadian west coast port. The Japanese party, headed by the Japanese ambassador, is on tour of inspection, then going on to New York to visit principal cities of the United States, returning to Vancouver, B.C., September 4th, by way of San Francisco and Seattle. The party includes prominent merchants, department store owners, Shochiro Sato, chief executive of the Japanese Cotton Company, and Shigetaro Matsui, advisor to the Hiroshima overseas development association. While in Canada and the United States they will make close studies of the industries and commercial ventures in which they are interested.

GLOBE CIRCLING FLIGHT ENDS IN CRASH

John Henry Mears, of New York, who took off from Roosevelt Field in globe-circling flight in an attempt to beat Graf Zeppelin time for the same trip but crashed at Harbor Grace, Newfoundland. His plane was wrecked.

Fire Destroys Quebec Village

Property Damage Is Estimated At \$250,000. Mascon, Que.—Between 500 and 600 persons are homeless, and nearly 80 houses destroyed—such is an estimate by Rev. J. McLaughlin, Resident parish priest of Mascon, of the conflagration which swept this little town recently.

Minister Joseph Lacomme died during the afternoon and although not injured in the fire, it is believed the devastation of a character difficult to describe. An area of over a quarter of a mile square, within this morning housed nearly 120 families.

Restrict Immigration

Dominion Government May Take Steps To Regulate Entry. Ottawa, Ont.—Indications are that steps will be taken by the Dominion Government to restrict immigration to Canada. While no official announcement was made at the conclusion of a meeting of the cabinet, it was understood that the matter of immigration was under discussion.

Any action taken, it is believed, would be aimed at the restriction of entry from European countries so as not to add to the unemployed. It is rumored that the government is considering a new act applying immigration will not likely be renewed, especially under present provisions. A statement on the subject of immigration may be issued shortly.

SAYS JUSTICE TO ALWAYS GOVERN ADMINISTRATION

Ottawa, Ont.—Hon. Arthur Sauve, Minister of Justice, has stated that "justice, honesty and economy" would be his policy in administering the post office department.

The text of the statement of the postmaster reads: "The post office, economy, such shall be my policy in the administration of the post office department. The law which governs us shall be maintained with discretion and regulations shall be observed with the greatest strictness.

"I shall continue to consider them as the most dangerous enemies of the country.

"I shall follow to the letter the policy of an honest man and a good Canadian, directed by the head of the government, and of sound protection which will permit the rational development and utilization of all the desirable resources of our country.

"The employees who have, without reserve, conformed to the law, understood their duty in their observance of impartiality and who have impartially shown the respect due to the political authorities or their representatives have nothing to fear from me.

"I shall make a distinction between the latter and those who have constituted themselves the active agents of their party or the carriers of lies and infamous calumnies. It would be unjust and cruel, for instance, to put on the street, without reason, a good father of a family who has been an officer in the military or a man who might find it difficult to work elsewhere.

"It is, I believe in the post office department that certain classes of employees are the most exposed to undue political partisanship.

"A careful inquiry will be made in regard to everything concerning my department, in order to avoid, as far as possible, injustices and errors. I am not inflexible but if I should commit an error, I shall do my best to repair it.

"The assurances given to me by the deputy minister, whom I have known for a long time, as well as by the heads of other branches, justify my belief that I shall be able to carry out, with success, the administration of my department.

"I have been very far from the idea of courtesy and deference of my predecessor, Hon. Mr. Veniot, who came loyally to call upon me and to give me the most appropriate certain information."

Trade With United States

Canada Is Best Customer Of United States During Year.

Washington, D.C.—In view of the approaching visit to the United States of representatives of the British Legion, Acting Secretary of State, William J. Carr, has addressed a letter to Sir Donald Lindsay, the British ambassador, suggesting an agreement between Great Britain and the United States for the waiver of visa fees. Such an agreement is sanctioned by a law passed in February, 1925, under which the secretary of state is authorized to conclude reciprocal agreements in certain specific instances.

Workers Are Concerned

London, England. The British Railway Trades Union are gravely concerned over the continuance of reductions of staff which have taken place throughout the country, nor is the prospect of a 2½ per cent cut in wages, mooted for November, to the liking of the men.

Donation For Kadium

Montreal, Que.—An announcement was made here by the superintendent of the Montreal General Hospital that a donation of \$50,000 had been received to be expended in the purchase of a new X-ray machine.

SUNDAY SCHOOL LESSON

AUGUST 24

JONATHAN AND DAVID—A NOBLE FRIENDSHIP

Golden Text: "He that maketh many friends, doeth it to his own destruction; but he that is true to his friend, doeth it to his own glory." Proverbs 18:24.

Scripture Reading: 1 Samuel 18:14; 19:17; Chapter 20, 2 Samuel 17:27.

Explanations and Comments

The First Meeting Of The Two Friends, 1 Samuel 18:14.—David's victory over Goliath had only brought about the defeat of the Philistines, but gained for him a position of honor in the eyes of King Achish.

Jonathan, Saul's son, the captain of the army, brought the victorious champion into the king's presence and Saul made him sit at his father's house. Jonathan was present at David's coming, and at once a beautiful friendship sprang up between the two. They made frequent, exchanging presents.

Nothing was too good for his new friend, Jonathan thought, for he loved David as his own soul, slipping off his own robe he gave that and all his apparel, even to his sword and bow and girdle, to David. It was David's victory over Goliath, Jonathan, but far from Jonathan's mind was David's interest in Jonathan, as George Matheson says, was an absolute selflessness for the sake of his friend.

"First, beginning with the love of Jonathan for David was a man of noble character in every way of friendship, in every deed of devotion, in every self-sacrifice of a protective hand, he was stripping himself of a royal garment."

"The prime fault of friendship is just the knowledge of a noble soul. Jonathan's heart on the day of his defeat revealed in all the riches of his royal nature—that day when Goliath was slain. David was proved to be the truest man of Israel, fullest of patriotism and beauty, courage and skill, and all his qualities were adorned and set off by his noble character."

As you read the story of friendship, in every deed of devotion, in every self-sacrifice of a protective hand, he was stripping himself of a royal garment."

"The prime fault of friendship is just the knowledge of a noble soul. Jonathan's heart on the day of his defeat revealed in all the riches of his royal nature—that day when Goliath was slain. David was proved to be the truest man of Israel, fullest of patriotism and beauty, courage and skill, and all his qualities were adorned and set off by his noble character."

Satisfaction Expressed With Result Of The Ottawa Wheat Conference

Would Waive Visa Fees

Reciprocal Agreement Between Britain and United States Is Mooted.

Washington, D.C.—In view of the approaching visit to the United States of representatives of the British Legion, Acting Secretary of State, William J. Carr, has addressed a letter to Sir Donald Lindsay, the British ambassador, suggesting an agreement between Great Britain and the United States for the waiver of visa fees. Such an agreement is sanctioned by a law passed in February, 1925, under which the secretary of state is authorized to conclude reciprocal agreements in certain specific instances.

"But in our last conversation you will recall I spoke of some proposals. First is the establishment of a correspondence high school where children of settled planters in the West Indies, every child more than four miles from a high school may take the course by mail and write off the examinations each year at the nearest examination point."

"We hope by this that many of the children of the West Indies will be able to assist in mining, agriculture, and other industries. This falls in line with our assumption, this October first, of our own natural resources. We are planning to do this, and we will leave nothing undone which we believe to be due."

Red Menace In China

Communists Advancing Against Nationalist Government.

Nanking, China. Communists were reported advancing against the Nationalist government capital of the country from of Hankow, Yangtze River from the sea. The Nationalist government reported that the Communists were advancing in the 32 mile wall circling the capital, practically all troops having been drawn to frontiers to the gorges of the Yangtze and the great river for supremacy in China.

Questions was rife here as to the possibility of a Communist invasion. It appeared in surrounding towns armed with rifles.

Thousands of terrified Chinese are fleeing to the city, frightened from their outlying homes by the invaders.

Eskimos Bound For Cuba

Make Journey By Dog Sled And Canoe Across Arctic Circle To Southern China.

Burlington, Iowa. Three Eskimos and their Canadian guide who left the Arctic Circle last year and hoped to reach China next, resumed their journey by canoe today, after an overnight stop at Burlington.

The Eskimos, Charles Plinius and his two sons, led by Frank O'Grady, said they left the Pas, Manitoba, March 21, 1929, went to the Arctic Circle, returned to the Pas, and then set out for the south in winter.

They continued by sled, they said, until they broke up. At Granite Falls, Minn., they launched their 18 foot canoe, and have travelled by that mode since. They expect to reach Hawaii early in 1931.

Makes Altitude Record

Regina, Sask.—Creating what is believed to be a record for western Canada, and breaking the Regina altitude flying record, P. B. Keffler, of the Regina Flying Club, climbed to an altitude of 18,250 feet over the city Tuesday afternoon, August 12.

As Regina is about 1,800 feet above the sea level, P. Keffler actually reached the height of more than 20,000 feet.

Nebraska Tourists See West

Winnipeg, Man.—On their way to the Pacific Coast, 175 "corn hucksters" from Nebraska, invaded Winnipeg en route to Vancouver, travelling over the lines of the Canadian National Railway, the "corn hucksters" who are gathered from the rural population of Nebraska and have travelled by themselves the glories of Western Canada.

A man living in Woolwich, England has made his own coffin and sleeps in it to be sure, it fits. There's a man who likes his bed. Industry has

With Macmillan and France preparing for war, widespread unrest in India, civil war in China, and women bandits in Berlin, it looks as though there will be a hot time in the old world tomorrow.

Although she may wear beach pyjamas the modern girl doesn't show any inclination to retire any earlier. She doesn't show much about the ankles, either.

Since a judge has ruled that miniature golf is not golf at all, they should give the midget game a new name. Why not turn the word golf around and call the new game "dog"?

While boys and girls in some American cities are getting to make two-stilling records, the farmers and townspeople of the Eastern Division Section are making two-stilling records. The well-to-do farms and urban homes in the division block are a joy to the vision and a source of pride to the owner.

OUR WHEAT PROBLEM

With Canada's wheat crop estimated at 400 million bushels, with a carryover of about 10 million bushels of the 1929 crop and with Europe exclusive of Russia, last year having 67 million bushels more wheat this year than last, Canada faces a serious problem in disposing of her wheat.

The situation is serious, and it should be given a prominent place in the discussion of the Imperial Economic Conference. Until Canada's wheat problem is solved the purchase power of the rest of the world, in fact, is restricted to a degree.

But while the fate of Canada's wheat hangs uneasily on the prairie farmer is not going down on his job for he is going about with a cheerful face, that gives a preview at his time, and he is carrying on "business as usual." His business at this time is the harvesting and three-fifths of the 1930 crop of wheat is doing it with his usual efficiency.

THE BROOKS FAIR

The Brooks fair is held September 1 and 2nd. "The show place of the Eastern Irrigation Section," as the sponsors of the fair call it, will have on exhibit field crops, fruit, vegetables, horticultural products, and live stock, showing what can be grown in the irrigation block.

To those who are not familiar with field and garden products grown in this irrigation section, the visit to the Brooks' fair will be a revelation. Given sufficient irrigation water, the fertile soil and ideal climate of this section of Alberta produce marvelous results in the growing of a long list of vegetables, bush and tree fruits, and field crops.

A PLEA FOR THE FORESTS

Every year Canada's annual loss by forest fire amounts to figures that are staggering. Much of this loss is due to carelessness of campers and hunters, and can be prevented by the practice of caution with fire while in the woods.

The Forest Service of the Dominion Government is now conducting an advertising campaign in an effort to teach people to be more careful with fire while in the woods on fishing, hunting, or camping trips. The campaign is nation-wide and extends even to the prairie provinces. Even though they may live hundreds of miles from the forests, many people who live on the prairies make annual trips to the woods for a few weeks' vacation, and to them also the doctrine of forest preservation must be taught.

The forest industries of Canada add five hundred million dollars annually to the national wealth. Preservation of our valuable timber land is vital to these industries and affects the national prosperity of the whole Dominion.

Bishop and Rabbi
 The late Archbishop Ireland of St. Paul and Rabbi Sellman of New York were fast friends, but they liked to joke each other. The archbishop was giving a dinner, and one of his guests was the rabbi.
 Said the Archbishop: "When can I serve you some of this delicious Virginia ham?"
 "At our wedding, Your Grace," replied the rabbi.

THE CAPTIVE

(By Daniel W. Heiley)

There is no turning back for him who goes down to the sea at seventeen or so. The master of the sea that leaps and flows

In emerald tides will haunt him. He will go

Forever with the sunrise on his lips. The purple dusk upon his brow, his ears

Thrilling with the wings of gulls. He will be a prisoner all his years.

Though full-blown moons may fall, and he will years

For young breasts pale as olives are.

He must go on where darkening breakers turn

To differ fire beneath the northern star.

Though he will beat on rocks eternally.

Forever he is captive of the sea!

BE YOURSELF

(By Alice Appleby)

It is hard to be a turnip. When you'd like to be a rose, And you'd like to be a cabbage

All the time.

And 'tis also very hard to be a little boy

When you want to be a monkey. And to climb!

But if you're born a boy

Just as hard as you can be. And then you see, you'll be just

What you are.

Least! "Mr. Peck, your wife has been arrested and is being held."

communicated. But the police chief is easy and a little money—"

Henry Peck—Fine, fine, and tell him that there's ten dollars for him

for every day he can keep her that way.

Analyzing a Drink

"Will you have a drink?" asked Sandy, noted for his thrift, of his guest, Angus MacLean.
 "Yes," said Angus, who tossed off and set the glass down thoughtfully. "That whusky," he observed, "is just right."
 There was a note in his tone that struck Sandy as somewhat peculiar. "Just right?" he said. "What do you mean?"
 "Well, if it were any better you wouldn't give it to me, and if it were any worse I couldn't drink it."

New Act Provides For Education of Ex-Soldiers' Children

Art Wakstyn, the Provincial Secretary at the Canadian Legion, B.I.R.C. in Alberta, has asked this office to be kind enough to publish the terms of the Alberta Provincial Act passed this year under which applications might be made for assistance to the children of ex-soldiers who require aid in obtaining further training in life as soldiers.

(1) The educational facilities which the Board may authorize shall be:

(a) Academic courses up to obtaining the standing required for entrance into the University of Alberta, or for a second class teacher's diploma.

(b) Technical, agricultural and commercial courses in those institutions which are covered by the Inspectorate of the Department of Education and Agriculture.

(c) Nursing, Domestic Science and kindred subjects covered by the Department of Health.

(2) The Board is only empowered to grant assistance to children who have attained Grade 8 (Eighth) standing or higher.

Further information can be obtained from any Branch of the Canadian Legion, B. I. R. C., in Alberta, or direct from the Registrar, The Education of Soldiers' Children Act P.O. Box 667, Edmonton, Alberta.

World's Grain Show

Regina, Canada, — J. A. Mooney, managing director of the World's Grain Exhibition and Conference, Regina, 1932, was the chief speaker at a luncheon tendered by this organization to the official delegates attending the World's Grain Congress, Crystal Palace, London, England, a few days ago. The luncheon was attended by over 200 delegates representing 40 countries of the world and presided over by Lucien T. Parand, acting high commissioner for Canada in London. Mr. Mooney spoke on the preparation being made for the holding of the World's Grain Exhibition and Conference at Regina in 1932, and emphasized the desirability of British farmers preparing exhibits for this event. He received a warm welcome from the delegates, all of whom gave assurance of their hearty support.

Regina, Canada.—To the province of Alberta goes the honour of making the first application for commercial space at the World's Grain Show to be held at Regina, Canada, in 1932. This application came to headquarters of the exhibition a day or so ago from the Peace River Co-operative Seed Growers' Limited, of Grande Prairie, Alberta. Other commercial firms have made inquiries regarding space, this, however, is the first completed application.

Call the S. P. C. A.

The teacher was teaching his class about parrot fever, and warned the pupils never to handle animals or birds, especially parrots, canaries, and so on.

"Can you give me an instance, Jackie?" he asked.

"Yes, sir; my Aunt Emily used to kiss her lapdog!"

"Yes, and...?"

"And it died, sir!"

Ask Dad, He Knows

Two modern little girls, on their way home from Sunday school, were solemnly discussing the lesson.

"Do you believe there is a devil?" asked one.

"No," said the other promptly, "it's like Santa Claus; it's your father."

Religiosity Lacking

Father-in-law: "When I gave you my daughter's hand, I didn't think that you were always going to be dependent on me."

Son-in-law: "Neither did I. I thought that you would give us enough to enable us to live independently."

Trust Mother Nature

"My husband is particularly liable to sea-sickness, captain," said she. The skipper nodded: "I've heard of the complaint before, ma'am."

"Could you tell him what to do in case of an attack?" asked the woman.

"Talk necessary, ma'am" replied the skipper. "He'll do it."

DESIGNED BY WOMEN FOR WOMEN

FIVE VITAL FEATURES Make Horpoint Electric Cookery Most Modern—Most Popular

OVER and above the cleanliness, convenience and other advantages of electric cooking Horpoint brings to thousands of homes five outstanding and exclusive superlatives. Only the Horpoint Hi-Speed Range was designed by women for women. Only Horpoint offers you Hi-Speed Elements—fastest and most economical of all range elements. Only Horpoint has All-Steel Construction with stain resisting enamel. Only Horpoint has Super Automatic Oven Control. And only Horpoint incorporates the Economy Cooker.

You can buy on easy terms... at new prices as low as \$85.

Here and There

Successful Canadian exhibitors in the International Grains and May Show to be held at Chicago, November 23-December 6, will be awarded liberal bonuses in addition to the regular prizes offered in the prize list now being distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway have also announced offers of special awards for Canadian exhibitors.

That silk are attracted by music seems to be established by the reactions of two fine specimens of that animal which are out of the bush when dancing begins at the Banff Springs Hotel every evening. Under the ballroom, where they begin to shake their heads and prance, snort and caper while the music plays, not even stopping to eat until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as reaching unusually high standards and recently the U.S. Congress of Canada, clearing from Vancouver to Chicago, Japan and the Philippines, carried 60 head of registered white leghorns consigned to Manila to be used in building up the poultry industry of the islands. The birds came from a poultry farm near Vancouver.

Captain R. W. McMurray, for the past five years marine superintendent of the Canadian Pacific's British Columbia coast steamship service at Vancouver and prior to that a commander with the Canadian Pacific trans-Atlantic fleet, has been granted in the London Times of July 31 captain in the Royal Naval Reserve, promoted from the rank of commander.

Sgt. R. E. McMurray, whose rank is equivalent to the army rank of brigadier-general, is one of the few living Canadian holders of such a high position in the R.C.M.P.

Here and There

Changes in operating organizations on Canadian Pacific western lines are announced as follows: H. Chow, superintendent of Saskatchewan southern lines, transferred from Regina to Edmonton; J. M. MacArthur, superintendent, Medicine Hat division, transferred to Regina; G. J. Fox, in charge of Edmonton division, transferred to Medicine Hat. These transfers are made in accordance with the company's policy of enabling its officers to broaden their experience in railway matters.

American golfers beat British players because they are more interested in the electric angles of the game and generally speaking try harder, according to Don Moss, interviewed at Vancouver, travelling Canadian Pacific from the western Open at Chicago and the American Open tournaments at Minneapolis. He described English golfers as the best sportsmen he had ever encountered.

Seven hundred Americans, about two-thirds women, toured New South recently by Dominion Atlantic Railway. After a week's visit at Halifax aboard R.S. California on the 15-mile limit, the larger part of which is spent at sea outside the 15-mile limit. There were three of these cruises during July and August from New York.

Five more new bridges are to be constructed. New Brunswick highway, leaders having been called for by Hon. D. A. Stewart, Minister of Public Works, for modern structures to be built with aid and improvement of roadway alignment. One of them will be an 80-foot span across the Little River at Grand Falls.

Since July 1 the wild rose is actually the floral emblem of Alberta. The Act passed by the Legislature at the last session, giving it to effect on Dominion Day.

Plan Your Town-- Save Your Money

At the same time, Little Boy, "Had No Walls" in His House.

The other day the writer heard a conversation between two men on the street. One said: "What's all this I hear nowadays about 'town-planning'?" The other replied: "It's just a lot of waste people's money." "No," said the other man, "it's just another plan to save people's lives and health and money besides." He was right. Town-planning does properly and early enough in the life of a growing town or city, does all those things. Perhaps the earliest illustration we have in history of town-planning is, however, a little unfortunate. When the great city of Rome was expanding in the centuries following the formation of the Roman Empire, the highly civilized Romans were so anxious to replace the old buildings and narrow streets that they put on a lot of private agitation with the result that, in the end, the older parts of the city were fired, and Rome burned.

Whether or not that be true, the old today advocates new methods for paving the way for town-planning. It is today based upon cooperation between land-owners and municipal authorities with the view of the good of the public, so that the city or town may be built to facilitate proper sanitation, health and pleasant living arrangements.

Consider the important question of sanitation. If a city grows too fast, as most cities have done in the past without its leaders giving a jealous eye to the future, the city's cleaning bills may be unnecessarily high. Expensive premises may have to be expropriated in order to lay sewers and water mains, or to put in pumping stations or filters. Town planning looks ahead and prevents such unnecessary expense.

Those of us who live in Toronto see every day a traffic situation which might have been averted by town-planning. Yonge Street, Toronto's main street, is too narrow to accommodate its traffic. Toronto is even now considering plans to re-model its downtown area. In other words, to town-planning it is necessary to lay out the city in such a way that the city's growth and the complexity of twentieth-century civilization.

But from the standpoint of health, one of the most important considerations of the town-planner, is playground space—parks as a rule. In Canada the growth of a city is usually, in fact one might say always, an industrial growth. The growth of the Ontario city of Oshawa is an example. A number of years ago, when the city was growing rapidly, it decided to take up their position at one point. The area, thus reserved, is apt to grow with great rapidity, and unless the public men are statesmen who think in decades or even in generations instead of just terms of office, the growth of the industrial centre from a village to a town or a city is apt to be haphazard.

Thus a city choked with its own growth, and by the very life that makes it great, its desirability as a place in which to live, and its value as a commercial centre is lessened. Proper planning of parks is a tremendous factor in the solution of this problem. For when growing city takes trouble to lay out a system of parks, it will, chances are, give heed to the streets in proximity to those parks. And insofar as the health of the city is concerned, parks are vitally important.

It must be borne in mind at all times, that many people who will benefit most from the addition of parks to a city, will not take advantage of them unless they are reached as easily as possible to reach them. That why you notice in most well-planned cities, that the parks are arranged so as to be on two sides of the street, that just as many people as possible can take advantage of their beauties.

"Go and buy a fryin' pan and a gallon of oil!"
"Want for?"
"It an' gong fishin'."—Peggy Ginn, Etobicoke.

W. N. M. 1933

If streets are planned so that the outside edges of the city are not too hard to reach, the result in a great many cities has been artistic suburbs and sections where rents are cheap and working people can live in happiness and health. In this case, traffic conditions permit them to cover more distance in a shorter space of time in getting back and forth to their work. Instead of being possible if the conditions had been studied in advance, instead of letting them take their own natural course.

The habits of the citizens the nature of the land, the levels of the land and a hundred matters come into the scheme of things in town-planning, but they are mostly problems for the engineers and the technical men. Nevertheless, they are of extreme importance and difficult to handle if there is not complete harmony in making the arrangements between the owners of the land and the people who are doing the planning.

Some cities have found themselves in a position where they could not build that every house must have a plot of land of decent size around it. Here is an enviable state of things and one that every municipality should seek.

When one starts to grow a town, we carefully lay it out so that all the plants will have breathing space no matter how thick the growth may become. The same ideal is even more marked in one place, where we call it thinning out.

It is rather difficult to "thin out" a town, but we do all our thinking in town-planning in advance. It is, however, only in recent years that we have begun to do so.

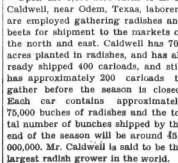

One of the most important things in town-planning is to have a good plan. It is, however, only in recent years that we have begun to do so.

Those of us who live in Toronto see every day a traffic situation which might have been averted by town-planning. Yonge Street, Toronto's main street, is too narrow to accommodate its traffic. Toronto is even now considering plans to re-model its downtown area. In other words, to town-planning it is necessary to lay out the city in such a way that the city's growth and the complexity of twentieth-century civilization.

But from the standpoint of health, one of the most important considerations of the town-planner, is playground space—parks as a rule. In Canada the growth of a city is usually, in fact one might say always, an industrial growth. The growth of the Ontario city of Oshawa is an example. A number of years ago, when the city was growing rapidly, it decided to take up their position at one point. The area, thus reserved, is apt to grow with great rapidity, and unless the public men are statesmen who think in decades or even in generations instead of just terms of office, the growth of the industrial centre from a village to a town or a city is apt to be haphazard.

Thus a city choked with its own growth, and by the very life that makes it great, its desirability as a place in which to live, and its value as a commercial centre is lessened. Similarity Between Indian and Chinese

Both Have Great Reverence For Their Women Ancestress

The modern Indian no longer adheres to primitive ways in many of the matters touching his daily life. But he has evidently still an innate regard for the tribal customs of the long ago when it comes to methods of government.

By a ballot vote of the residents on the Ontario Reserve, Council has been decided that the women shall continue to elect the Chiefs and Council. Thus the modernistic tendencies of the younger generation, a generation that rides in automobiles and has been educated in a modern academic and vocational school, have been squelched for the time being.

It is not surprising that modernism should seek to find expression in the exercise of the franchise. In this case the modernism took the form of demanding votes for men; not for women. Therein lies the difference between the Indian way of looking at things and the ways of the white man.

The same ideal is even more strongly marked in the Chinese, who are the most ancient ancestor worshippers in the world, particularly of women who are the heads of families. The most powerful figure in a Chinese family is a grandmother. Her word is law in all matters concerning anything that pertains to family affairs, even her eldest son being a mere nonentity by comparison. To argue with a grandmother, to make a suggestion that differs from hers in the smallest degree, to refuse to do as she says, is tantamount to a heinous offence which nothing but death can expiate. Her position as a grandmother, her years of experience, are revered as nothing else can be. The modern Indian is a far more enlightened being, however, than the average Chinese. But there appears to be a similarity between the original Canadians and the Chinese in respect for the wisdom of the womenfolk.

The Sea's Greatest Depth

Spot Near Philippines Is Just Short Of Seven Miles

Soundings taken in the Mindanao Deep in the Pacific Ocean, near the Philippines, proved recently that the sea's greatest depth is 35,410 feet. However, it is not convenient to build a permanent house with its face to the south, the Dominion Post says. In the new bulletin No. 132, of the Department of Agriculture, at Ottawa, states that good results have been obtained by putting a row of windows along the back of the house under the drop-board. When this is done it is of great importance, have the windows lighted, then, muttering freely, walked away.

Had Enough Of Oats
Two sailors in a train were discussing the general situation. Said the tall one: "When I got done with this life, I'm going to get a pair of nice light oars, and I'm going to sling them across my shoulder and start to walk in London. When I find that a pair of oars is better than a pair of legs, I'll be a sailor." "What are those things you got on your shoulder?"—boy, that's your 'im going to settle down!"

Good For Zero Weather
A "humble" shoe has just been invented by a Hungarian shoemaker. An electric pad is concealed between the inner and outer soles, and the wearer may heat it by attaching a connector to the heel with a wall plug. The heat lasts about an hour and a half.

"Polly" on the Air

The following well-known Canadian artist took part in the presentation, Jeanne Dussan, soprano, as "Polly," Allan Burr, late of the American Opera House, as "Captain Macfie," a mulatto; Beatrice Morson, contralto, as "Mrs. Trape"; John Detweiler, baritone, as "Lieutenant Vandenberg"; and Alfred Heather, tenor, as "Mr. Duac."

John Gay's second comic opera, "Polly," which forms a sequel to "The Beggar's Opera," following the radically Captain Macfie from a London go to scenes of new adventure in the West Indies, introducing the celebrated Polly Peachum, was presented for the first time on the air in Monday, May 11, from 8:15 to 9:45 p.m., eastern daylight saving time, in the Canadian Pacific Railway's programme of music from WXYZ and various associated stations of the National Broadcasting Company.

The Young Man: "I've come to see you about your daughter."
The Girl's Father: "Too late she eloped last night with a young fool who has got her into a bad way."

The Young Man: "You're right about the money—but I'm not a fool!"

CELESTIAL PASSENGER TRAFFIC MANAGER

N. R. Deshray, now assistant passenger traffic manager for the Canadian Pacific Railway, western lines, succeeding C. E. McPherson, retired Mr. Deshray was formerly general passenger agent at Vancouver.

The Maple Sugar Industry
People Of That Canada Can Consume All That Is Produced
That Toronto newspaper which says that the maple syrup and sugar industry of Canada faces ruin because of the new United States tariff duty on these products is to be higher than the Indian way of looking at things and the ways of the white man.

The same ideal is even more strongly marked in the Chinese, who are the most ancient ancestor worshippers in the world, particularly of women who are the heads of families. The most powerful figure in a Chinese family is a grandmother. Her word is law in all matters concerning anything that pertains to family affairs, even her eldest son being a mere nonentity by comparison. Her position as a grandmother, her years of experience, are revered as nothing else can be. The modern Indian is a far more enlightened being, however, than the average Chinese. But there appears to be a similarity between the original Canadians and the Chinese in respect for the wisdom of the womenfolk.

Sunshine Is Essential

Poultry House Should Face South Or South-East

Experience has taught that the poultry house should face the south or south-east. This is important as it admits the maximum of sunshine which is the cheapest disinfectant. If, however, it is not convenient to build a permanent house with its face to the south, the Dominion Post says. In the new bulletin No. 132, of the Department of Agriculture, at Ottawa, states that good results have been obtained by putting a row of windows along the back of the house under the drop-board. When this is done it is of great importance, have the windows lighted, then, muttering freely, walked away.

Ocean Safer Than Lakes

Captain Would Rather Navigate Ship In Deep Waters

On the Great Lakes sailors class as men who follow a seasonal occupation. That may sound to sail-water people like an opening for jeers. Seamanhood looks a lot like a dead end when men remain snugly on shore during the four or five coldest and stormiest months of the year. The "Post" story was that at least, appear never to have found much appeal in the lives of the summer-time sailors of the inland seas. Literature which would produce thrills must have its heroes face fearful things in winter. To be shattered by the blast between May and November gives more the impression of an unlucky accident than an adventure.

Any boy who is inclined to that hasty view, however, should form a chummy acquaintance with some old lake man and hear his opinion of the comparative ease of sail-water navigation, where there are thousands of miles of seaway in which to keep a ship from being wrecked. The hurricane that never let under such conditions? Here on these inland seas a ship never can get more than about fifty miles from land. The hurricane that never let under such conditions? Here on these inland seas a ship never can get more than about fifty miles from land. The hurricane that never let under such conditions? Here on these inland seas a ship never can get more than about fifty miles from land.

One On the Policeman
New York Man Gets Best Of Argument About Parking
The other day a young gentleman parked within ten feet of a fire hydrant in West Street—or so, as a policeman said. "I'm going to give you a ticket," said the policeman. "Wait a minute," protested the young fellow. "How do I know I'm not too close to that hydrant?" "I'll show you," the policeman replied, and stepped off the distance, toe and heel. It came to nine and a half feet, the policeman said. "What does that prove?" demanded the young man, who must have been of enormous courage. "Maybe you feel more than a foot long. Certainly," he continued with a downward glance, "they look much longer to me." The policeman stared at him, danced, then, muttering freely, walked away.

Had Enough Of Oats
Two sailors in a train were discussing the general situation. Said the tall one: "When I got done with this life, I'm going to get a pair of nice light oars, and I'm going to sling them across my shoulder and start to walk in London. When I find that a pair of oars is better than a pair of legs, I'll be a sailor." "What are those things you got on your shoulder?"—boy, that's your 'im going to settle down!"

Imports Are Necessary

No Country Can Get Along Without A Certain Amount

Some Canadians have the idea that the United States is practically self-contained. They think that it would be better for Canada if she were in a similar position. But the United States is very far from being self-contained. It carries on a very large trade with other countries in all parts of the world. That trade accounts for more than nine billion dollars in 1928. Imports totalled more than four billions, and exports to Europe, to other countries in America, to the Orient and elsewhere, exceeded five billion dollars.

It would be less possible for Canada, with its great surplus production of certain agricultural products, to be self-contained and live to itself. It must export and it cannot do so without importing as well as countries do. To suppose that Canada can keep on exporting, and stop importing to a large extent, is absurd. The United States imports goods to the value of more than four billion dollars. The difference of about a billion dollars between exports and imports is accounted for by such items as interest payable on foreign loans and the large amounts spent by tourists abroad. Except for such items the imports must balance the exports.

Had Him Scared
The minister addressed for a man to make himself generally useful, and one evening a young man called on him. "Well," said the minister, "can you clean windows?" "I think so," said the young man, with some surprise. "Are you a gardener?" "Fairly." "Can you wash dishes and polish silver?" "Gracious!" exclaimed the young man. "As bad as that?" "As bad as what?" asked the minister in surprise. "Well," explained the young man, "I'm going to get married, and I came to ask you to publish, the wedding."

Obligations Of Industry

Employers Should Consider Welfare Of Those Who Make Business Possible
Industrialists who consider only profit and loss sheets and do not consider the welfare of the employees who contribute so much to the profits are, in the opinion of Mr. Denton Massey, minister of labour, advanced in their civilization than the cave-man in his. Mr. Massey was speaking at a meeting of the Industrial Accident Prevention Association.

There is another form in which employers owe obligations to their workers. That is to ensure practical security of tenure to the efficient hands so far as their jobs are concerned. Men may be buying their way out of a job, but if employers they may lose all they have. There is no more damaging blight on a man's life than the loss of employment. An employer should have a strong moral reason, as well as an economic one, before he decides to turn a man out of his job.

There is another form in which employers owe obligations to their workers. That is to ensure practical security of tenure to the efficient hands so far as their jobs are concerned. Men may be buying their way out of a job, but if employers they may lose all they have. There is no more damaging blight on a man's life than the loss of employment. An employer should have a strong moral reason, as well as an economic one, before he decides to turn a man out of his job.

Old Fire-Fighting Days

Story In Recent Journal Tells Of Early Methods

A recent issue of the Edmonton Journal sounded too watery to be true: "Put Out Blaze With Beer In Old Fire-Fighting Days." But the story was too quaint to be fiction. "Way back before 1882 every body turned out to form a bucket-slinging brigade. But in that year they bought a chemical cart, to which the volunteers were summoned by the first siren to reach the sledgehammer behind the great bell in front of the hall. Most of these volunteers kept their 'maddie horses' picketed on the grassy street by the front door, ready for an alarm.

The little chemical cart later gave place to a blustering steamer, for which there was no special team. Instead, five dollars rewarded the first man to swing his horses across the pole. There were a good many manly races, some of which resulted in fights in event of a tie. This steamer pulled its water from eleven underground cisterns scattered throughout the town. Some of the most valiant yeoman service was given by the first regular fire squad in defence of the bell against the marauders from Strathcona (now South Edmonton), who came over to steal it so as to feel better for losing the Dominion hall. About this time a twenty-minute street fight resulted in the bell remaining north of the river.

There were big fires in those early days, even after water mains were installed. When Robertson hall burned down in 1906, pressure was so low that adjoining buildings could not be soaked. But the basement of Jasper House was full of inflammable material. These were run up, the knots knocked in, and buckets of the beverage thrown on neighboring houses to prevent the fire from spreading. About this time a first fire team, a pair of dappled grey called Jack and Mable, were bought, the envy of local horsemen. When the town turned to trucks they were sold to a farmer. But they preferred town life plowing, and ran away, returning to the stable, ready for the next alarm. A petition to the city council to the two greys a pension for life in a nearby farm—Winnipeg Free Press.

Pure Seed Important

Soil Conditions Should Also Be Considered When Selecting Variety

With the wide range of climate and soil conditions which obtain throughout Canada, the variety in need is of outstanding importance. A variety which gives good results in the southern and eastern sections of the Dominion often proves entirely unsuited to the more rigorous conditions of the heavier soils and harder frosts of the west. There is also a marked difference in the size, color and quality of different varieties of the same crop. It is therefore particularly important that the seed should be pure as to variety.

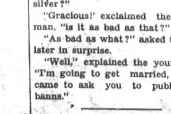

The Dominion Seed Branch are extending the work of purity of variety tests this year. Inspectors of the branch have already obtained samples of the seed of cereals, flax, field peas and beans, from seedmen throughout Canada. The cereal division of the Dominion Department of Agriculture, at the central experimental farm, will test these samples for purity of variety and the results of these tests will prove particularly important to the trade and to Canadian farmers.

In Commercial Cases

Basketweaver lignite was placed definitely in the commercial coal class when the first tests to illustrate the utility of the coal were made in Regina, says the Canadian Press. The tests were conducted under the direction of Hon. J. A. Merley, Provincial Minister of Railways, Labor and Industries. The development of a great coal industry in the southern part of the province is predicted, as well, from the engineers' findings.

Famous Cattle For Canada

A story from the Isle of Jersey states the cattle industry of the island has received a severe shock in the announcement that John Perrie, Jersey's famous breeder, has sold his herd consisting of about 100 head of prime cattle to Messrs. S. H. Bull and sons, of Brampton, Ontario. The Jersey breeders regard it as a thing of a calamity that the herd should be allowed to leave the island.

According To Custom
The two men had sheltered together in the same doorway for an hour, waiting for a lull in the torrential and unceasing rain. "Will it never stop?" asked the peasant. "It always has," replied the priest.

They were both looking at the priest. "Yes, but you are coming or going?"—Gutterer, Madrid.

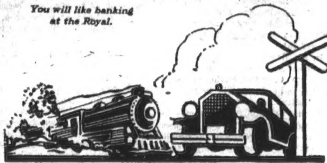

They were both looking at the priest. "Yes, but you are coming or going?"—Gutterer, Madrid.

R-I-S-K-I

TO-DAY, the lure of easy profits induces many to run the risk of financial disaster—to-morrow, the vision of wealth may be rudely shattered.

What will the future hold for you?—a comfortable balance in the Bank or vain regrets for hasty action.

You will like banking at the Royal.

What Life Insurance Does

"Life insurance avoids the uncertainty of leaving things to the neighbors. It is a business plan founded on the laws of mathematics to provide for those dependent upon us in case of death. Life insurance is no charity. Life insurance is a duty and it is a privilege. Don't leave your loved ones to the care of the public or the neighbors. The neighbors have many troubles of their own."—Elbert Hubbard.

One KODAK Snapshot brings back a host of memories

HOW quickly childhood passes! Youngsters are grown-up almost before you realize it! Some day you'll want to remember your children just as they used to be. And when that day comes you'll treasure above all else the Kodak snapshots that are so easy to make now.

Take plenty of pictures of your children
Kodaks are as low as 45 here

STILES "The Druggist"

Local Notes

Mrs. McFarlane is visiting with relatives in Crossfield.

Mr. and Mrs. Lloyd Roach returned last Tuesday from a vacation spent at Waterton Lakes, Calgary, and other points.

Mr. Keeling, of Gen. passed through Bassano on Wednesday on his way to Calgary. He expects to thresh an average of about 30 bushels of wheat per acre on his farm this fall.

Mrs. J. M. Conway and younger children are visiting with relatives in Edmonton.

Mrs. A. H. O'Keefe and children have returned to Bassano from a vacation spent in Calgary.

Dr. A. G. Scott and son George are planning on going to Winnipeg in their airplane about the end of the week. Dr. Scott will attend a convention in Winnipeg.

Mrs. Geo. Morrison is leaving early in September on a trip to the Old Country.

John Wallace, manager of the Nelson ranch, which Mr. J. Ogilvie recently sold to N. H. Neilson, was in town on Thursday. Mr. and Mrs. Wallace and children are now living on the ranch, which is located on the Red Deer river north of Gen. They are getting their mail at the Gen. post office.

Perry Johnson, son of Mr. and Mrs. H. T. Johnson, is now working on the McKinnon ranch on the Bow River.

T. N. Simpson and son Art are cutting wheat with their combine on Roy Cling's farm southeast of town. The yield is turning out fairly well for this dry year, being estimated between 16 and 18 bushels per acre.

Miss Violet King, who is taking a course at Garbutt's Business College, was home for the week-end.

Mrs. Chas. Hopkins and Alisa returned home last Saturday. They have been spending a vacation at the Pacific coast.

Jimmie Donaldson, of Chatham, is spending his summer holidays with his parents in Bassano.

Mr. and Mrs. P. Gayford and Hugh were in Calgary last week-end.

Miss Gladys Hayes spent Sunday with her sister Lillian in Calgary.

Miss E. McArthur returned to Bassano last Sunday after spending a month's vacation visiting in Lethbridge and at home at Innisfail.

Mrs. M. D. Macdonald is visiting relatives in Providence, Rhode Island.

Down and Out.

Judge—"It will go hard with you this time, Sambo; you look as if you have been drinking again."
Sambo—"Yes, sah, Judge, sh' am powerful stuff. Ah had. It was dat dere chicken hooch."

"Chicken hooch? Why, I have never heard of that before."
"Yes, sah, Judge, chicken hooch. One drink and you lay."

Page Dr. Viscerally.

George Ade, in his quality of cynical bachelor, said at the Chicago Athletic Club:
"I was sitting with a little girl of eight one afternoon, she looked up from her Hans Anderson and said:
"Does m-i-r-r-a-g-e spell marriage, Mr. Ade?"
"Yes, my child," said I."

SILOS FOR THE WEST

The silo is a valuable means for storing feed for winter use or to supplement the pasture in spring and fall. By properly packing it, particularly at the edges, when filling and removing six inches per day, a excellent nutritious feed is available for all classes of stock at all seasons of the year, with very little waste.

Since the silage has certain laxative properties which keep the digestive organs of animals in good condition. Animals receiving some kind of succulent feed have no inclination to eat, softer and more pliable skin, and a more healthy appearance than those fed exclusively on dry rations.

Each year is marked by the erection of a few more silos in the prairie provinces, but unfortunately the number is not so large as is warranted by the success which attends their use. At the Dominion Experimental station, Lacombe, Alberta, three general types of silos, the above ground, the pit, and the trench, have been used for a number of years with such excellent results that we have no hesitation in recommending them to anyone keeping a number of live stock.

The above ground wood stave silo gives satisfaction as far as it can be in this climate of cold winters. Feeding to the great drawback where it is built in the open exposure freezing can be prevented by blowing a straw mat around it at threshing time and the straw can be used for bedding in the spring and summer. A silo 16 feet in diameter by 36 feet high holds about 120 tons of feed.

In sections where the water level is below the surface of the ground pit silos might be used. They are no easier to fill and more difficult to get the ensilage out of, unless a hoist must be used, but they have the advantage of being easy to construct since the farmer's main outlay will be in the form of iron and the ensilage does not freeze.

One of the desirable features of the trench silo is its low cost. Any farmer can make one with practically no cash outlay. A few days with a team and scrapes will excavate a trench the required length and depth and some old staves will do as a cover. During filling the ensilage should be kept spread evenly and well tramped.

The usual depth of the trench silo is 8 feet. A width of 14 feet at the top and 6 feet at the bottom is the usual width. A silo of this size will require a silo 30 feet long.

A trench silo should be located only after careful consideration of the drainage, soil, and feeding convenience.

Dominion Experimental Station, Lacombe, Alberta

TAR FOR ROADS

EDMONTON, Alta.—Success in the extraction of tar from bituminous sands in the McMurray area of northern Alberta is said to have required ten years of effort on the part of Dr. K. A. Clark of the University of Alberta. It is reported that 92 per cent pure tar was taken from the sands in recent experiments, and it is estimated that thousands of dollars may be saved in road building and other developments as a result of the availability of this material.

Anxious to Oblige

Mild—"The goat on the third floor wants to know if you can lend him a corker."
Manager—"Yes, certainly, tell him I'll be up." It moved directly.

BROOKS FAIR

Monday and Tuesday September 1 and 2, 1930

Two Days of
EDUCATION FUN and FROLIC

The Brooks Fair is the show place of the
Eastern Irrigation Section.

Come and see the Finest Fruit, Flowers, Vegetables, and Field Crops Produced in Alberta

Splendid Prizes Offered

for Livestock, Field Crops, Garden Crop, Poultry, Horticultural Products, Domestic Work, and Dairy Products.

Vulcan 25 Piece Band

This splendid organization of musicians (twice winners of the Western Canada Band Competition at the Calgary Fair) will render musical selections both days at the Fair Grounds between all events.

CANADIAN TOBACCO

OTTAWA—Canadian farmers consequent upon research work done by the Dominion Department of Agriculture are now producing practically all the fine tobacco required by Canadian manufacturers, observes Dr. E. H. Archibald, director of Dominion Experimental Farm, who adds that the quality is better than that of the imported leaf.

WORLD HAPPENINGS BRIEFLY TOLD

James R. Layton, of the Ontario Agricultural Development Board, died at his home, in Toronto, aged 65.

The King conferred the Order of Commander of the British Empire on Miss Amy Johnson, at Buckingham Palace, recently.

A commercial treaty between Hungary and Roumania has been signed. It is based upon the most favored nation policy.

Motor bus competition has caused the closing recently of 36 railway stations of one road in England for lack of use.

Mary Pickford, Vilma Banky, and Rod La Roque, motion picture stars, will appear in Broadway stage plays this fall.

A \$20,000,000 power development contract on the Abitibi Canyon site, 65 miles north of Cochrane, on the T. N. O. Railway, has been let by the Dominion Construction Company.

The Chinese Press reported that 1,000 persons had died in floods between Peking and Montreal. Twenty towns were flooded, in bridges washed out and traffic disrupted, it said.

John A. Embry, formerly assistant commercial attaché at Vienna, Austria, has taken up his duties as United States trade commissioner for the prairie provinces, at Winnipeg. He succeeds Charles E. Brookhardt, transferred to Washington.

E. W. Shields, of Washington, chief of animal husbandry, United States Department of Agriculture, said recently that the drought has resulted in so much livestock being thrown on the market for slaughter that the American dollar buys more meat now than at any time during the past 12 years.

Mammoth Sealplane

Consolidated Aircraft Corporation Has Plans For "Plane To Carry 100 Persons"

Construction of a sealplane, large enough to carry 100 persons across the Atlantic ocean, will be started at Buffalo shortly, it was announced by Major R. H. Fied, president of the Consolidated Aircraft Corporation.

The plane, powered by 16 Curtiss Conqueror motors, will be equipped with sufficient storage tanks to carry twice as much fuel as would be needed for the ocean flight.

Passengers will be able to enjoy a 200-foot stroll along a promenade on the ship, Major Fied said, and there will be 62 staterooms with specially constructed walls to keep out the roar of the motors.

Make Good Soap

Soviets Make Toilet Soap From Rats, Mice and Other Things

Who would have thought, before the days of the Soviet, that dead rats, mice and marmosets would provide Moscow with a popular toilet soap called "My Grandmother's Bouquet"? That is what the corpses of these creatures are now destined for.

Soap must be made from the Soviet, from cats and dogs, too. One cat, boiled down, gives five ounces of fat, one dog more than a pound.

The dead pigs and dead goats of the community in general will yield, it is estimated, 5,000 tons of fat for soap.

Saskatchewan's Exhibit

Saskatchewan's contribution to the Canadian, live bird exhibit at the World's Poultry Congress, in London, England, is made up of 33 fowl and five turkeys according to F. Hickey Auld, Deputy Minister of Agriculture. The exhibit was assembled at the University of Saskatchewan.

"I think I'll open up an office when I graduate."

"It'll probably turn out to be a janitor, my friend."

Brazil has an amateur photography craze.

It is better to meet a bill than the collector later.

NO LONGER SUFFERING FROM THE PAIN OF CONSTIPATION. FRUIT-A-TIVES END ALL YOUR TROUBLE.

W. N. U. 1232

Canada's First Chinese Professor

Son Of A Mandarin Will Be Professor At McGill University

The son of a mandarin has become Canada's first Chinese professor. He is Kiang Kang-Hu, holder of more than a dozen university degrees, who will assume duties as professor of Chinese studies at McGill University, at Montreal, in September.

An educationalist, editor, writer and statesman, Kiang-Hu has a considerable background in the Chinese language and literature. He was a leader in the Chinese Imperial government, was producing most of China's educational text books and was editing a daily paper at Tsingtau.

Once the fall of imperialism in old China, and Prof. Kang-Hu founded the Social Democratic Party. He became leader in social reforms and helped draft the constitution of the republic in 1924 and 1925.

Since 1928 he has been consultant in Chinese for the United States congressional library, at Washington, D.C. As early as 1914 he lectured in Chinese culture in the United States and was a member of the University of California for six years. During the present summer he has been professor of Oriental art at the University of Oregon.

Prof. Kang-Hu has written many books in Chinese, Japanese, and English. And in the past he lectured in Chinese culture in the United States and was a member of the University of California for six years. During the present summer he has been professor of Oriental art at the University of Oregon.

Mining Men Gather At The Pas

Annual Western Meeting To Be Held In Northern City

Mining men from east and west will renew old acquaintances on September 2nd, when members of the Canadian Institute of Mining and Metallurgy will gather at The Pas, on the occasion of the annual western meeting which is being held this summer in the first city of the North.

Headquarters for the visiting men will be a Canadian National Railway train, which will provide sleeping accommodation together with dining facilities while the conference lasts. Side trips to Sherridon and Flin Flon will be made, and the Sherridon-Gordon and the Hudson Bay Mining and Smelting Company mine inspected.

Among those who have intimated their intentions of attending the meeting are: L. L. Houston, M.A., H.E.S., Assistant Deputy Minister of Mines for Canada; C. H. Attwood, Deputy Minister of Mines and Natural Resources for Manitoba; John McLeish, B.A., F.R.S., director, Mines Branch, A. C. Wilson, chief, Division of Mineral Resources, Mines Branch; A. Bulson, engineer, Mines Branch; Prof. T. L. Walker, University of Toronto; R. R. Rowe, editor, Canadian Mining Journal; J. McEckern, superintendent, Bank of Montreal; F. V. Rickett, superintendent, Manitoba and Saskatchewan, Department of Natural Resources, Canadian National Railway; Toronto; J. W. Holmes, Montreal, and F. H. Edmonds, Saskatoon.

In December, 1932, he was blinded in a dynamite explosion in a gold mine at Headley, B.C. Sensitive of his weakness, overcame his handicap by the use of his eyes. He passed through Winnipeg during June, 1914, on his way to the gold fields of the Yukon, and he has since been handicapped by blindness in the light of his experience.

Mr. Lawley, who comes from near Manchester, is a notable example of a man who has mastered the disadvantages of his handicap. He followed the loss of his vision, and now is an enthusiastic and capable worker in the interest of those who are handicapped by blindness in the light of his experience.

Hope For The Blind

Work Of Royal Commission May Prove Of Great Help To Blindness

The blind people of Manitoba and Saskatchewan are looking with much interest at the recommendations of the royal commission now investigating their situation, said Dr. Barker Lawley, worker among the blind and without vision himself, who testified before the commission on assistance given to blind people in the British Isles.

Recipes For This Week

(By Betty Barclay)

DUCK AND ORANGE SALAD
(Serves 8-10)
2 cups cold duck cut in small pieces.
1 orange.
1/2 cup salad oil.
1 tablespoon lemon juice.
1/2 teaspoon salt.
1/2 teaspoon pepper.
1/2 teaspoon paprika.
Lettuce.

Cut the duck into small dice. Peel the oranges and slice very thin. Mix the lemon juice and seasonings until well blended. Pour this dressing over the duck and oranges and allow to stand for a few minutes. Serve on lettuce with additional dressing of any desired kind, if necessary.

STRAWBERRY BATHS
Demand for strawberries is greater in Europe this season than for many years because so much of the fruit is being used for beauty culture. Not only is it being applied in beauty parlors, but strawberry baths are taken in private homes. The idea was taken from the chronicles about Madame Tullien, a noted beauty of her day, who was said to take every morning a bath in which 20 pounds of strawberries were crushed. The bathwater was changed every day.

GEORGETTE PUDDING SAUCE
Eggs.
2 1/2 tablespoons sugar.
1/2 cup 1/2 lemon.
1 tablespoon water.
Grated rind 1/2 lemon.
Beat yolks of eggs until thick and lemon-colored, beat in one and one-half tablespoons sugar, add lemon juice and rind and boiling water, and cook in double boiler, stirring constantly, until thick and creamy. Beat whites of eggs until light; then beat in gradually the remaining sugar. Combine mixtures; cook one minute; stir occasionally until cool; use on cottage pudding, or serve as a sauce with a delicate pink, lined with lady-fingers or thin slices of sponge cake.

Thomas W. May, veteran civil engineer, who, as a young student at Edinburgh University, was a classmate of Robert Louis Stevenson, died recently at Charlottetown, P.E.I., at the age of 86 years. He had been employed for nearly 60 years with the Island Railway and the provincial government. A native of the Channel Islands, Mr. May came to Prince Edward Island as a young man, and was one of the first surveyors of the Prince Edward Island Railway.

Johnny, what are you doing in the pantry?
Johnny—Oh, just putting a few things away.

Cellar graves 2,000 years old have been found at Peen, Hungary.

Western Fisheries
It is not generally known that the Prairie Provinces of Canada—Manitoba, Saskatchewan and Alberta—contain important commercial fisheries. In 1929 the commercial value of fish caught in these provinces exceeded \$4,000,000.

Great Britain has retained a full share of world trade throughout the period of depression, he stated, and because of labor redundancy, has actually fared better than many other nations.

Will Muddle Through
Great Britain Will Overcome Present Era Of Depression
It is not the first time Great Britain has been forced to overcome a depression, and as in the past, the mother country will overcome the present era of industrial and labor depression, said Walter Cuffine, general secretary of the British Trades Union Congress, who was tendered a civic reception and dinner in Toronto.

Great Britain has retained a full share of world trade throughout the period of depression, he stated, and because of labor redundancy, has actually fared better than many other nations.

Great Britain has retained a full share of world trade throughout the period of depression, he stated, and because of labor redundancy, has actually fared better than many other nations.

City of Saskatoon To Do Away With Impostuous Tax Year

The city income tax will not be imposed in Saskatoon this year.

At the last session of the provincial legislature in the summer of 1931, the City Act provided that the levying of the tax would be optional, but any council deciding not to impose the tax would have to indicate its intention early in the year.

Mayor John W. Hain, who has long been opposed to the tax, recently declared that it would never be levied so long as he had any say in the matter. He did not believe that any city had the necessary machinery to collect income tax, and further he contended that it was far from equitable. The exemptions were not considered fair.

In addition to the mayor most of the members of council are opposed to this form of tax, having repeatedly expressed themselves in favor of its abolition.

Annual revenue from the city income tax in past years has not been large. "Total" collections, usually amounted to about \$20,000 per year. Considerable difficulty has also been experienced in collecting the tax.

Strawberry Baths
Demand for strawberries is greater in Europe this season than for many years because so much of the fruit is being used for beauty culture. Not only is it being applied in beauty parlors, but strawberry baths are taken in private homes. The idea was taken from the chronicles about Madame Tullien, a noted beauty of her day, who was said to take every morning a bath in which 20 pounds of strawberries were crushed. The bathwater was changed every day.

GEORGETTE PUDDING SAUCE
Eggs.
2 1/2 tablespoons sugar.
1/2 cup 1/2 lemon.
1 tablespoon water.
Grated rind 1/2 lemon.
Beat yolks of eggs until thick and lemon-colored, beat in one and one-half tablespoons sugar, add lemon juice and rind and boiling water, and cook in double boiler, stirring constantly, until thick and creamy. Beat whites of eggs until light; then beat in gradually the remaining sugar. Combine mixtures; cook one minute; stir occasionally until cool; use on cottage pudding, or serve as a sauce with a delicate pink, lined with lady-fingers or thin slices of sponge cake.

Thomas W. May, veteran civil engineer, who, as a young student at Edinburgh University, was a classmate of Robert Louis Stevenson, died recently at Charlottetown, P.E.I., at the age of 86 years. He had been employed for nearly 60 years with the Island Railway and the provincial government. A native of the Channel Islands, Mr. May came to Prince Edward Island as a young man, and was one of the first surveyors of the Prince Edward Island Railway.

Johnny, what are you doing in the pantry?
Johnny—Oh, just putting a few things away.
